# Standard ERP

Standard ERP by HansaWorld is a business software covering all needs for small and medium-sized companies in all sectors. Developed by the award winning software house HansaWorld, the program covers everything from quotation to payment and automatically posts the corresponding transactions to the general ledger. To maximize your revenue, Standard ERP is also unique in offering truly interactive Customer Relationship Management (CRM), allowing you to follow up on customers and making sure no business opportunities are lost.

Within minutes of installing Standard ERP, you will have entered your first contacts and items and will be raising purchase orders, receiving goods into your inventory and setting up customer specific price lists and discounts. To help you monitor your business, the program contains many useful reports, giving in depth analysis of your sales, purchasing and bookkeeping. If you should require assistance with the software, there are over 100 eLearning videos that will support you through every aspect of using Standard ERP, from initial setup through day to day data entry and reporting. Also you can refer to a database of questions and answers on our website, plus there is an extensive forum in place to help you.

To get even more from your software, Standard ERP´s built-in Marketplace offers you the possibility to add additional users or additional features that you might require. You can also chose to have your software set up as a cloud installation, giving you complete access, regardless of where you are. Standard ERP is the only software in this segment offering a native solution that can be used on computers with Windows or Mac OSX as well as on tablets and smartphones with Android, iOS or Windows 8, thereby giving you a truly flexible solution where you decide what to use and only pay for the features that you actually need.

Should your business needs change, you can upgrade within the same product family ranging all the way to Enterprise by HansaWorld, a full featured, multi-platform application containing Enterprise Resource Planning (ERP), Customer Relationship Management, E-commerce and a long list of industry specific solutions.
